(24 March 2017 – to date)

NATIONAL WATER ACT 36 OF 1998

(Gazette No. 19182, Notice No. 1091. Refer to the Act for commencement dates)

WATER USE LICENCE APPLICATION AND APPEALS REGULATIONS, 2017

The Minister of Water and Sanitation has, under section 26(1)(k) and 41(6) of the National Water Act, 1998 (Act No. 36 of 1998), as amended, made the Regulations in the Schedule.

SCHEDULE

INTERPRETATION AND DEFINITIONS

1. Interpretation and definitions

APPLICATION OF WATER USE LICENCE

2. Purpose
3. Application fora\[sic\] water use licence
4. Application for an integrated water use licence
5. Pre-application enquiry meeting
6. Submission of a water use licence application
7. Multiple water use licence application

PROCESSING OF WATER USE LICENCE APPLICATION

8. Evaluation of application prior to acceptance
9. Compliance of an application with formal requirements

SITE INSPECTION MEETING AND SUBMISSION OF A TECHNICAL REPORT ON WATER USE LICENCE APPLICATION

10. Site inspection
11. Submission of a technical report on water use licence application
12. Assessment of a technical report on water use licence application

CONSIDERATION OF AND DECISION ON A WATER USE LICENCE APPLICATION
13. Consideration of and decision on a water use licence application
14. Security by applicant
15. Surrender of water use entitlement to facilitate licence application
16. Application for renewal or amendment of water use licence

PUBLIC PARTICIPATION

17. Procedure for public participation
18. Register for interested and affected parties
19. Public Participation Report

GENERAL MATTERS

20. Offences

APPEALS

21. Appeals in terms of section 41(6) of the Act
22. Submission of appeal to Minister
23. Decision on appeal
24. Short title and commencement

ANNEXURES

ANNEXURE A: Summary of time frames for receiving and steps in processing of a water use licence application

ANNEXURE B: Forms and reports to be completed in respect of a particular water use application

ANNEXURE C: Checklist for evaluation of application prior to acceptance

ANNEXURE D: Table of contents of Technical Reports for minimum information requirements to be submitted

WATER USE TECHNICAL REPORTS:

1. Waste water treatment for water treatment plants
2. Agricultural technical report or business plan
3. Stream flow reduction activity
4. Integrated water and wastewater management plan
5. Geohydrology
1. Definitions and Interpretation

1.1 In these Regulations, any other word or expression to which a meaning has been assigned in the Act shall have that meaning assigned to it in the Act, and unless the context requires otherwise –

(a) "applicant" means a person or a representative of that person who makes an application for a water use licence in terms of the Act;

(b) "application" means an application for a water use licence in terms of the Act;

(c) "cumulative impact" in relation to a water use, means the impact of a water use that in itself may not be significant, but may become significant when added to an existing and potential impacts eventuating from similar or diverse water use activities or undertakings in the area;

(d) "days" means calendar days, subject to sub-regulation 1(4) of this Regulations;

(e) "Environmental Management Plan" means a plan contemplated in section 1 of the National Environmental Management Act, 1998 (Act 107 of 1998);

(f) "multiple water use licence application" means a water use licence application with more than one water uses that are interlinked, provided the application belongs to one person and the water uses are exercised by that person;

(g) "Pre-application enquiry meeting" means a process referred to in regulation 5;

(h) "prospecting" has the meaning assigned to it in the Mineral and Petroleum Resources Development Act, 2002;
(i) "receipt" means receipt on the date indicated –

(i) on a receipt form if the application or document was hand delivered or sent via registered mail;

(ii) in an automated or computer generated acknowledgment of receipt;

(iii) on an acknowledgement in writing from the responsible authority as the date of receipt if the application or document was sent via ordinary mail; or

(iv) on an automated or computer generated proof of transmission in the case of a facsimile message.

(j) "responsible authority" means the responsible authority contemplated in section 1 of the Act;

(k) "sector" include mining, industry, agriculture, forestry, infrastructure and local government developments;

(l) "state department" means any department or administration in the national or provincial sphere of government exercising functions that involve the management of the environment;

(m) "the Act" means the National Water Act, 1998 (Act No. 36 of 1998), as amended;

(n) "timeframes" means the period within which a particular response, decision or other step in the process must be concluded in terms of these Regulations;

(o) "water use" means water use as contemplated in section 21 of the Act; and

(p) "water use licence application technical report" includes water use registration forms, public participation report, and specialist studies.

1.2 When a period of days must, in terms of these Regulations, be reckoned from or after a particular day, that period must be reckoned as from the start of the day following that particular day to the end of the last day of the period, but if the last day of the period falls on a Saturday, Sunday or public holiday, that period must be extended to the end of the next day which is not a Saturday, Sunday or public Holiday.

1.3 For any action contemplated in terms of these Regulations for which a timeframe is prescribed, the period of 15 December to 5 January must be excluded in the reckoning of days.
1.4 Where a prescribed timeframe is affected by public holiday, the timeframe must be extended by the number of days falling within that timeframe.

2. **Purpose of Regulations**

   The purpose of these Regulations is to prescribe the procedure and requirements for water use licence applications as contemplated in sections 41 of the Act; as well as an appeal in terms of section 41(6) of the Act.

**APPLICATION FOR WATER USE LICENCE**

3. **Application for water use licence**

   (1) An applicant for a water use licence must make such an application to a responsible authority, as prescribed in these Regulations.

   (2) In the case where an application is made by a representative, such an application must be accompanied by a letter authorising a representative to act on behalf of that person.

   (3) A responsible authority must keep a register and copies of all –

   (a) applications for water use licence made in terms of these Regulations; and

   (b) decisions made in respect of water use licence applications.

   (4) Where a national electronic system is used for the recording of applications for water use authorisation, the responsible authority shall use such system to keep the records referred to in sub-regulation (3)(a) and (b).

   (5) When a national electronic system is used for the submission of applications for water use licence, such system must be used by all applicants.

   (6) The process of water use licence application, consideration and decision shall be undertaken within a period of 300 days of submitting such application.

4. **Application for integrated water use licence**

   (1) For a water use licence application contemplated in section 41(5)(a) of the Act, the applicant must submit a written proof of acceptance of an application for a permit or rights issued by the Department of Mineral Resources, within a period of 5 days from date of issuance of such letter.
(2) The responsible authority shall only consider a water use licence application contemplated in sub-regulation (1), upon receipt of a letter contemplated in that sub-regulation, and any other relevant documents required in terms of these Regulations.

5. Pre-application enquiry meeting

(1) The applicant must undertake a pre-application enquiry meeting with the responsible authority prior to submission of an application.

(2) During the pre-application enquiry meeting contemplated in subregulation (1) the responsible authority must advise the applicant on the procedural requirements and required documents for a water use licence, the type of a water use licence required, the information required, and the technical report for the proposed water use licence.

(3) The applicant can submit his or her application at any time after the pre-application enquiry meeting.

6. Submission of the application

(1) An application contemplated in these Regulations must be made in accordance with the provisions of sections 40 and 41 of the Act.

(2) Applications shall be submitted in the relevant form listed in Annexure B of these Regulations.

(3) The application shall be accompanied by relevant documents of a particular water use application, as listed in Annexure B or any other such documents as may be required by the responsible authority during or after a meeting contemplated in regulation 5.

(4) Upon receipt of an application, the responsible authority must issue the applicant with a receipt as proof of application.

7. Multiple water use licence application

(1) If an applicant intends applying for a multiple water use licence within the same catchment area, the responsible authority may consolidate the water use applications into one.

(2) If the responsible authority has consolidated an application in terms of sub-regulation (1), the responsible authority must apply the provisions of section 27 of the Act in respect of each water use applied for.

PROCESSING OF WATER USE LICENCE APPLICATION

8. Evaluation of application prior to acceptance
Upon receipt of an application, the responsible authority must evaluate whether the application –

(a) is properly completed and accompanied by relevant documents contemplated in Regulation 6(3); and

(b) has taken into account any minimum information required for the application, and instructions or guidance provided by the responsible authority to the applicant.

9. Compliance of an application with formal requirements

(1) The responsible authority must, in writing, and within 10 days of receipt of an application contemplated in regulations 6 –

(a) accept the application; or

(b) reject the application.

(2) Rejection letter of an application contemplated in sub-regulation (1)(b) must provide adequate reasons for the rejection.

(3) If the application is rejected as contemplated in sub-regulation (1)(b), the responsible authority will have no obligation to consider that application any further.

SITE INSPECTION MEETING AND SUBMISSION OF TECHNICAL REPORT ON WATER USE LICENCE APPLICATION

10. Site inspection

(1) Where an application necessitates a site inspection, the applicant must, within 5 days of receipt of an acceptance letter contemplated in regulation 9, confirm arrangements for site inspection with a case officer.

(2) The site inspection can take the form of:

(a) a meeting between the applicant and the responsible authority; or

(b) a meeting between the applicant, the responsible authority and other relevant stakeholders.

(3) Following the site inspection, the responsible authority shall inform the applicant, in writing, of the information required to compile a technical report for a water use licence application within 5 days of the site inspection.
(4) The site inspection process must be concluded within a period of 30 days of acceptance of an application contemplated in regulation 9.

(5) Failure by the applicant to confirm a date for site inspection and to make himself or herself available on agreed date will result in the responsible authority rejecting the application.

11. Submission of technical report on water use licence application

(1) The applicant must, within a period of 105 days of the date of being informed of the required information for compilation of a technical report on water use licence application, as contemplated in regulation 10(3), submit such a report to the responsible authority, including any relevant specialists reports as set out in Annexure D.

(2) Failure to submit the required water use licence application technical report within the stipulated timeframe will result in the rejection of the application.

(3) Where the application is rejected under sub-regulation (2) the responsible authority must notify the applicant and any other interested and relevant institutions.

12. Assessment of technical report on water use licence application

(1) The technical report on water use licence application shall be subjected to an evaluation to check whether it meets formal requirements of these Regulations

(2) The responsible authority must, within 10 days of receipt of the technical report on water use licence application –

(a) accept the technical report on water use licence application, if the report meets the formal requirements of these Regulations; or

(b) reject the application in writing, if the report does not meet the formal requirements of these Regulations.

(3) The written rejection contemplated in sub-regulation (2)(b) must state reasons thereof.

(4) If the technical report on water use licence application meets the requirements of these Regulations the responsible authority shall proceed with the technical assessment which shall be finalized within 139 days.

(5) The responsible authority may request written comments from relevant competent authorities or state departments before making a decision on water use licence applications.
The responsible authority may invite the applicant to present his or her specialist reports.

CONSIDERATION OF AND DECISION ON AN APPLICATION

13. Consideration of and decision on a water use licence application

A water use licence application shall be considered and finalized within 144 days from the date of acceptance of the technical report on water use licence, and in accordance with the processes stipulated in Annexure A.

14. Security by applicant

(1) The applicant who is required to provide a security in respect of a particular water use licence application must complete and submit to the responsible authority Annexure E.

(2) The security is to specify coverage of individual items as well as the operation of the whole system.

(3) The security shall be valid for a period of at least 5 years after water use licence activities have lapsed.

15. Surrender of water use entitlement to facilitate licence application

The provisions of these Regulations are applicable to a water use licence application made as a result of the surrender contemplated in section 25(2) of the Act.

16. Application for renewal or amendment of water use licence

(1) The consideration for an application for renewal or amendment of a water use licence must be done in accordance with the provisions of sections 50 and 52 of the Act.

(2) Any other amendment which is of such an extent that it will have the effect of a new licence shall be subjected to the procedure and timeframes stipulated in these Regulations.

PUBLIC PARTICIPATION

17. Procedure for public participation

(1) A procedure for public participation must be conducted as contemplated in section 41(4) of the Act, as part of the water use licence application process.
(2) Where a public participation process has already been undertaken through the Environment Impact Assessment processes or any other public consultation process, and that public participation process contains and covers all issues pertaining to water use activities, then that public participation process report may, subject to approval by the responsible authority, be submitted for the requirements of the water use licence application.

(3) Notice of the application must be provided to interested and affected parties by:

(a) fixing a written notice board at a visible and accessible place to the public at the boundary or on the fence of:

   (i) the site where the water use activity to which the application relates is or is to be undertaken; or

   (ii) any alternative site mentioned in the application.

(b) giving written notice to:

   (i) the owner or person in control of that land, if the applicant is not the owner or person in control of that land;

   (ii) the occupiers of the site where the water use is or is to be undertaken or an alternative site where the water use is to be undertaken;

   (iii) owners and occupiers of land adjacent to the site where the water use is or is to be undertaken or an alternative site where the water use is to be undertaken;

   (iv) the municipal councillor of the ward in which the water use is or is to be undertaken or an alternative site where the water use is to be undertaken and any organization of ratepayers that represent the community in the area;

   (v) any organ of state having jurisdiction in respect of any aspect of the water use activity,

   (vi) any person who has submitted a valid land claim in respect of the area in which the water use activity will be conducted; or

   (vii) any other interested and affected party as required by the responsible authority.

(c) placing an advertisement in –

   (i) one local newspaper, or
(ii) any official Gazette that is published specifically for the purpose of providing public notice of applications or other submissions made in terms of these regulations.

(d) placing an advertisement in at least one provincial newspaper or national newspaper, if the water use has or may have an impact that extends beyond the boundaries of the metropolitan or local municipality in which it is undertaken; provided that this paragraph need not be complied with in an advertisement has been placed in an official Gazette referred to in sub-regulation (3)(c)(ii); and

(e) using reasonable alternative methods, as agreed to by the responsible authority, in those instances where a person is desirous of but is unable to participate in the process due to –

(i) illiteracy, or

(ii) disability.

(4) A notice, notice board or advertisement referred to in sub-regulation (3) must –

(a) give adequate details of the application which is subject to public participation; and

(b) state the following –

(i) that the application has been submitted to the responsible authority in terms of these Regulations as the case may be;

(ii) the nature and locality of the water uses to which the application refers;

(iii) the water uses;

(iv) where further information on the application or water uses may be obtained;

(v) the manner in which and the person to whom representations in respect of the application can be made;

(vi) a specified date, no more than 60 days after the last publication of a notice, before which written comments or objection may be lodged; and

(vii) an address to which written objections may be lodged.

(5) A notice board referred to in sub-regulation (3) must, -

(a) be of a size at least 60 cm by 42 cm; and
(b) display the required information in a font size of not less than 48.

18. Register of interested and affected parties

The applicant must open and maintain a register which contains the names and contact details and addresses of all persons referred to in regulation 17(3)(b), who took part in the public participation process, during the period the water use licence application was being considered and two years after the licence is granted.

19. Public Participation Report

(1) The applicant must compile and submit a public participation report to the responsible authority containing the following –

(a) written comments or objections of interested and affected parties;

(b) records of meetings; and

(c) register of interested and affected parties as contemplated in regulation 18.

(2) Where a person is desirous but unable to access written comments as contemplated in sub-regulation (1) due to –

(a) illiteracy; or

(b) disability,

reasonable alternative methods of recording comments must be provided for.

GENERAL MATTERS

20. Offences

(1) A person is guilty of an offence, if that person –

(a) wilfully and knowingly provides an incorrect or misleading information in his or her application; or

(b) wilfully and knowingly omits information that may have an influence on the outcome of a decision of a responsible authority
A person found guilty in terms of these Regulations is liable to the penalties as contemplated in section 69(2) of the Act.

**APPEALS**

21. **Appeals arising out of the integrated water use licence applications**

(1) An applicant or a person who objected to an application and who is aggrieved by a decision of the responsible authority on a water use licence application, arising out of the integrated process contemplated in section 41(5) of the Act may lodge an appeal to the Minister, as contemplated in Regulation 22.

(2) Any appeal other than an appeal contemplated in sub-regulation (1) must be lodged and dealt with in accordance with section 148 of the Act.

22. **Submission of appeal to Minister**

(1) A person contemplated in regulation 21(1) must submit a notice of intention to appeal in accordance with Annexure F, to the Minister, within 30 days of becoming aware of the decision or of being provided with reasons for the decision.

(2) The Minister, may, in writing, and on good cause shown, extend the period within which a notice of intention to appeal must be submitted.

23. **Decision on appeal**

(1) A decision on an appeal to the Minister in terms of these Regulations will be made without any appearance by the appellant before the Minister.

(2) The Minister must, after receipt of appropriate information make and communicate a decision contemplated in sub-regulation (1) within 90 days of receiving the appeal.

(3) A decision contemplated in sub-regulation (1) must be accompanied by the reasons thereof.

24. **Short title and commencement**

These Regulations are called the Water Use Licence Application and Appeals Regulations, 2017, and take effect on the date of publication in the Gazette by the Minister.

This form allows the applicant to provide information about their water use in respect of

- Impeding or diverting flow does not cause any loss in flow.
- Impeding or diverting structures can fully or partially extend into a river, forcing the natural flow direction to be re-directed around the structure.
- Impeding or diverting can be temporary, during construction of a road bridge for example. It can also be permanent, such as the building of a low water bridge across a river where the flow is permanently impeded as it moves under the bridge.
- Gauging weirs are an example of impedance if

A description of the location of the activity, including
- (aa) the 21 digit Surveyor General code of each cadastral land parcel,
- (bb) where available, the physical address or farm name,
- (cc) where the required information in sub-regulation (aa) and (bb) is not available, the coordinates of the boundary of the property or properties,

When providing coordinates, such coordinates must be provided in degrees, minutes and seconds using the Hartebeesthoek94 WGS84 coordinate stem.

A plan which locates the proposed activity or activities applied for at an appropriate scale, or if it is-
- (aa) a linear activity, a description and coordinates of the corridor in which the proposed activity or activities is proposed; or
- (bb) on land where the property has not been defined, the coordinates of the area within which the activity is proposed

Where applicable, proof of acceptance of an application for any right or permit in terms of the Mineral and Petroleum Resources Development Act, 2002 or environmental authorisation as per regulation 7 must be provided

1 WASTE WATER TREATMENT/WATER TREATMENT PLANTS TECHNICAL REPORT

A THE EXECUTIVE

The executive summary should summarise the overall benefits of the water supply and or waste water management project to the beneficiary communities. In regards to a waste water management project it should highlight the major environmental findings and how these will be managed to prevent, reduce or rehabilitate adverse impacts.

B TABLE OF CONTENTS OF THE TECHNICAL REPORT

Application for a licence to take water from a water resource for domestic and industrial supply, and to dispose off/sic/ waste from a waste treatment works by, e.g. discharge, irrigation etc.

WASTE WATER TREATMENT WORKS AND WATER TREATMENT WORKS (POTABLE USE)

Part 1: Administrative Information and Brief Project Description
(NB: use maps to indicate the information where necessary.)

1.1 Name, address, telephone and fax numbers and contact persons for:
• Water Services Authority/Water Services Provider/

• The holding company/authority/

• The applicant (name and status))

1.2 Details of existing exemptions - if applicable.
   *(In terms of sections of the National Environmental Management Act. If exempted, attach copy of letter to the report)*

1.3 Details of the contract between the water services authority and the water services provider.
   *(Attach a copy of the contract to this report)*

1.4 Magisterial district and relevant regional services authority

1.5 Name of the nearest town/residential area and its distance from the site

1.6 Surface infrastructure serving the site (e.g. roads, railways, power lines, etc.)

1.7 Ownership of the land

1.8 Longitude and Latitude of the site

1.9 Zoning of the land

1.10 Ownership of adjacent/potentially impacted land

1.11 Occupier of the adjacent land

1.12 Zoning of the adjacent land

1.13 Name of the river catchment

1.14 Brief description of the intention of this application

1.15 Has the Water Treatment Plant and/or Sewage Treatment Works been included in the Water Services Development Plan (WSDP)
   *WSDP Registry File Number as given by the Department*

**WASTE WATER TREATMENT WORKS**

Part 2: Description of the Environment (for orientation and first order screening)
2.1 Climate

2.1.1 Regional climate

2.1.2 Rainfall data

2.1.3 Temperature data

2.1.4 Wind data

2.1.5 Evaporation data

2.1.6 Any extreme weather conditions prevalent (e.g. snow, frost, hails, etc.)

2.2 Topography

2.3 Soil

2.4 Geology – General geology of the area-presence of dykes sills and faults

2.5 Land capacity (arable, grazing, wetland or wilderness)

2.6 Land use-zoning

2.7 Natural vegetation and plant life

2.8 Surface water

- *name of nearest watercourse*

- *water quality - pH, conductivity etc.*

- *surface water use (domestic, industrial, agricultural, recreational or natural environment)*

- *water authority*

- *presence of wetlands*

2.9 Groundwater

- *presence and position on a map, of boreholes within a 1000 m radius of the site*
• yield of boreholes

• ground water use

• ground water quality (pH, conductivity, nitrate)

2.10 Air quality

2.11 Noise

2.12 Sites of archaeological interest

2.13 Sensitive landscapes

2.14 Visual aspects

2.15 Regional socio-economic structure *(Short description)*

Population, economic activities, unemployment rate, housing demand, social infrastructure, water supply and sanitation, power supply

2.16 Interested and affected parties

2.17 Industrial activity

*(types of industries present, waste purification, - by industry/third party, by local authority)*

Part 3: Water supply

3.1 Water use

3.1.1 Sources of water

*(local authority, river, boreholes, sea, irrigation board or water board, use of excess groundwater, recycled waste (internal source, eg. Cooling water), recycled waste (external source, e.g. sewage waste)*

*(In all above cases the average daily/monthly and maximum daily/monthly quantities are required)*

3.1.2 Yearly usage patterns (e.g. more in summer than winter)

3.1.3 Yearly water use

3.1.4 Water rights (Legal documents)
Part 4: Description of Reticulation system

4.1 Percentage of area served which is un-sewered

4.1.1 How is this area serviced:
( *pit latrines bucket system, conservancy tanks, septic tanks and French drains* )

4.2 Percentage of the area which is sewered or to be sewered

4.2.1 What type of network is in place/will be installed

- (standard reticulation, small bore system)

4.2.2 Location of sewers

- midblock
- standard

4.3 Nature of sewage

4.3.1 Domestic component-projections (no. of persons)

<table>
<thead>
<tr>

<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

4.3.2 Industrial component

- daily volumes/expected volume treated
- type of industrial waste (mainly organic, organic, heavy metals, mixture)
- names of industries contributing to the volume (and locally treated) including problem constituents received from each

4.4 Hydraulic and organic loading

4.4.1 Hydraulic loading
4.4.2 COD load (g/day)

4.4.3 Total Nitrogen as TKN (g/day)

4.4.4 Phosphate as P (g/day)

4.4.5 Peak dry weather flow factor- Xx Normal DWF

4.4.6 Peak wet weather flow factor- Xx Peak DWF

Part 5: Description of Sewage Treatment works and Classification

5.1 Inlet works (screens, grit channels and flow measurement)

5.1.1 Method of disposal of screenings and grit, (e.g. by burial, incineration, etc.)

5.1.2 Location of the disposal site and/or the name of the solid waste dump

5.1.3 Method of flow measurement

5.2 Primary sedimentation tanks:

5.2.1 What is the nominal upward flow rates for:

- average dry weather (m$^3$/hr)
- peak storm flow (m$^3$/hr)

5.3 Septic tanks

(number of septic tanks and volume of each, average retention time in the tank(s) at average dry weather flow (hours), average depth of tank(s) (m), (proposed) methods of periodical desludging, methods of disposal of the sludge so removed, method of disposal of the overflow, if not to further processing, e.g. to French drains, soak-away, etc.).

5.4 Biological filtration systems

(Cubic metre of settled sewage per cubic metre of media per day (m$^3$/m$^3$/day), number of grams of "4 hour PV" per cubic metre of media per day (gm/m$^3$/day))

5.5 Activated sludge systems - where applicable, give proprietary names: State the:
5.5.1 Type of system and basic design information;

5.5.2 Method of operation; and

5.5.3 Method of phosphate removal, if any.

5.6 Humus tanks or secondary sedimentation tanks:

5.6.1 What is the nominal upward flow rate for:

- average dry weather flow (m³/hr)
- peak storm flow (m³/hr)

5.7 Sludge handling:

5.7.1 State the quantity of wet sludge (to be produced per day) (m³)

5.7.2 State the method of treatment of surplus activated sludge discharged, prior to its disposal on land or to drying beds or by other means

5.7.3 State the relative digester capacity (m³/capita)

5.7.4 State the total digester capacity (m³)

5.7.5 How is the supernatant liquid (to be) disposed of

5.7.6 If land disposal of wet sludge is (to be) used, state the area of land (ha)

5.7.7 State the relative capacity (m³/capita) of any sludge drying beds

5.7.8 State the total area (m²) of any sludge drying beds

5.7.9 How is drainage from the beds or other separators (to be) dealt with?

5.7.10 What other means are (to be) used for dealing with digested or any other sludge?

5.7.11 How is dried sludge (to be) finally disposed of, e.g. on land, by incineration, etc.?

5.8 Oxidation pond systems:

5.8.1 Describe any pre-treatment units ahead of the ponds and state their capacity
5.8.2 State the number of ponds in the system, their depth and surface area for each

5.8.3 Give the sequence of flow through the pond system

5.8.4 What is the:

• average dry weather flow (m$^3$/hr)
• peak storm flow (m$^3$/hr) of the pond system, if any?

5.8.5 Where is the outflow (to be) directed to, e.g. evaporation ponds, irrigation, etc.

5.9 Tertiary treatment – state basic design details, where applicable for:

5.9.1 Micromesh screens

5.9.2 Rapid gravity sand filters

5.9.3 Slows and filters

5.9.4 Hamlin filters

5.9.5 Reed bed systems

5.9.6 Maturation pond system, (i.e. the number of ponds, the sequence in which they are used (e.g. in series), the retention time in each pond (days) and the total capacity of the ponds (m$^3$))

5.9.7 Phosphate removal - give details of the method and of the basic design

5.9.8 Disinfection of the final effluent - (if by chlorination, give details of the method and the contact time in the pond or contact tank; if by any other method, UV light, ozone, etc., give details of use, including the period of application and the intensity)

5.9.9 Any other tertiary treatment

5.10 Classification of works and operators

5.10.1 Is the works classified?

5.10.2 Are all operators classified?
5.11 Fencing around the works-describe.

Part 6: Water and Materials Balance Diagram

(Supply a flow diagram showing all inputs and outputs (including materials, chemicals, wastes, sludge's, solid waste etc.)

Part 7: Management Systems and Pollution Prevention Methods

7.1 Description of hierarchy of operating staff

7.2 Availability of mechanical maintenance staff

7.3 Availability of electrical maintenance staff

7.4 Availability of process control staff and/or process consultants

7.5 Are there a set of drainage by-laws in place (if so, attach a copy)

- are there by-laws actively administered

7.6 Technology - (This must be answered considering the description of the environment and the environmental impacts)

7.6.1 Is the waste treatment process the best option to protect the described environment – motivate

7.6.2 Is the disposal practice the best option – motivate

7.6.3 Is the best available technology in use (best environmental option) - motivate

7.6.4 What is the alternative option of treatment and disposal?

7.6.5 Why was the proposed/existing option chosen?

7.7 WQ Operational Management Plan

7.7.1 What are the chances of a system failure?

7.7.2 What are the implications of such failure?
7.7.3 What safety factors have been used?

7.7.4 What is the management and maintenance plans?

7.7.5 Availability of standby/spare equipment?

7.7.6 What is the accident and emergency action plans?

7.7.7 What plans are there to minimise the pollution hazard/potential?

7.7.8 What monitoring and auditing systems do you have to detect malfunctions?

7.7.9 Are there alarm systems in place at all pump stations?

7.7.10 Are there notification procedures for the downstream users?

Part 8: Disposal of solid waste and sludge

8.1 Description of solid waste

8.1.1 Solid waste

- quantity (tons per day, tons per year)

8.1.2 Analyses of solid waste (composition and percentages)

8.2 Description of sludge

- quantity (tons per day, tons per year)

8.2.1 Analyses of sludge

8.2.2 Classification of sludge according to the Guidelines: Permissible Utilisation and Disposal of Sewage Sludge, Edition 1 August 1997.

8.2.3 Disposal to ponds/lagoons Groundwater monitoring

8.2.4 Land disposal

- (Irrigation, Composting, Analyses of soils, On site/Off site, Description of groundwater monitoring)
8.2.5 Description of contracts for removal of sludge

Part 9: Final Waste Disposal Evaluation

(There are various options which can be taken when disposing of waste. It can be disposed of to:

- land, ponds/dams and or irrigation, groundwater, recharging of aquifers, surface water, estuaries or lagoons, sea, surf zone, deep sea pipeline, air - evaporation, municipal works or private contractor, contained areas, mined out areas (underground)

The waste disposal practice needs to be fully evaluated taking into account various norms and standards. It is imperative that the practice is shown to have a minimal environmental impact and that the practice has the minimum effect on the health and interest of other water users in the environment.)

9.1 Quantity

- (number of days discharged, average m$^3$ per day/maximum and peak, average m$^3$ per year/maximum and peak)

9.2 Land disposal-ponds or dams

9.2.1 Waste quality analyses

(pH/conductivity/suspended solids (SS)/COD/NH/NO/Ortho phosphate (asP)/Feacalcoli)

9.2.2 What is the waste quantity

- daily volumes
- monthly volumes for each month

9.2.3 What is the geology under-lying the dams

9.2.4 What is the depth of the water table?

9.2.5 What is the slope of the site

9.2.6 What is the average monthly evaporation and rainfall

- monthly totals
9.2.7 Calculate the positive/negative monthly evaporation rate using all the above information

9.2.8 Calculate the size of the ponds required. Take into account the waste that was stored during months of negative evaporation rates.

9.2.9 What is the situation of the dams with regard to?
   (Rivers/boreholes/use/yield/quality/springs/fountains/natural depressions/urban areas/dwellings)

9.2.10 Is the dam site protected from ingress of stormwater

9.2.11 What is the use of groundwater in the vicinity
   (Domestic/agricultural/industrial/recreational/environmental)

9.2.12 Have the dams been sealed with
   • plastic liners
   • bentonite or other clay

9.2.13 Are there seepage collection drains and returns pumps

9.2.14 Describe the leakage detection and monitoring systems in place

9.3 Land disposal - Irrigation areas

9.3.1 Waste quality analyses
   (pH/conductivity/suspended solids (SS)/COD/NH/NO/Ortho phosphate(asP)/Feacalcoli)

9.3.2 What is the waste quantity?
   • daily volumes
   • monthly total for each month

9.3.3 What is the average monthly evaporation and rainfall?

9.3.4 What is the crop to be irrigated

9.3.5 What is the crop factor

9.3.6 What type of irrigation method issued (flood or overhead?)
• how many overhead sprayers are in place

• how many days are in an irrigation cycle (attach an irrigation design layout and management plan)

9.3.7 What is the irrigation/application efficiency?

9.3.8. Determine the monthly crop irrigation requirements

9.3.9 What is the permeability and infiltration rate of the soil profile

9.3.10 What is the slope of the irrigation area

9.3.11 What is the root depth of the soil

9.3.12 What is the underlying geology

9.3.13 Calculate the size of the irrigation area required. Take into account the irrigation of waste that was stored during months of negative evaporation rates.

9.3.14 What is the depth of the water table
  *(Summer/winter)*

9.3.15 Quality of the groundwater (macro analyses - major anions and cations)

9.3.16 Slope of the irrigation area

9.3.17 Direction of groundwater flow

9.3.18 Situation of the area with regard to:
  *(Rivers/boreholes/use/yield/quality/springs/fountains/natural depressions/urban areas/dwellings)*

9.3.19 What is groundwater in the vicinity used for?
  *(Domestic/agricultural/industrial/recreational/environmental)*

9.3.20 Are there environmental protection methods in place such as:

• stormwater cut-off trenches above the site

• cut-off canals below the site
9.3.21 What soil amendments are done per season to sustain soil fertility and permeability

9.3.22 Soil evaluation (analyses)

9.4 Disposal to groundwater

9.4.1 Waste volume

9.4.2 Waste quality analyses

\[(\text{pH/conductivity/suspended solids (SS)}/\text{COD}/\text{NH}/\text{NO}/\text{Ortho phosphate(asP)}/\text{Feacalcoli})\]

9.4.3 Depth of groundwater

9.4.4 Yield of groundwater (1000 m radius of disposal area)

9.4.5 Quality of groundwater (macro analyses - major anions and cations)

9.4.6 Potential use of groundwater

\[(\text{Domestic/agricultural/stock watering/irrigation/industrial})\]

9.4.7 Critical quality component

9.5 Disposal to surface water

9.5.1 Quantity of waste

9.5.2 Annual discharge pattern

9.5.3 Name of minor river catchment

\[\text{• area of catchment, mean monthly run-off, quality of river upstream of discharge}\]

9.5.4 Waste quality analyses

\[(\text{pH/conductivity/suspended solids (SS)}/\text{COD}/\text{NH}/\text{NO}/\text{Orthophosphate (asP)}/\text{Feacalcoli})\]

9.5.5 Established use of river

\[(\text{domestic/agricultural/industrial/recreational/environmental})\]

9.5.6 Establish the applicable WQ Criteria

9.5.7 Establish the critical components
9.5.8 Name of major river catchment
   (*Collect same information as for minor catchment)

9.5.9 Quality of minor catchment before discharge into major catchment (analyses)

9.5.10 Quality of major catchment river upstream of Minor River (analyses)

9.5.11 Quality of major catchment river downstream of confluence of Minor River

9.5.12 Mean monthly run-off of major catchment upstream of Minor River

9.5.13 Describe the RWQO’s for the total catchment

9.5.14 Calculate Waste Load Allocations (WLA’s) and the effect which the discharge will have on the REQO (Receiving Environmental Quality Objectives)

9.6 Discharge to lagoon and estuary – This discharge could have an impact similar to surface or sea discharge. The questions related to surface discharge will be applicable.

9.7 Disposal by Evaporation
   (Evaporation occurs within a process of because of excess heat, or in cooling towers or in specially designed dams where it is promoted. If evaporation is promoted by means of an evaporation pond system then the points that have to be addressed are the same as mentioned under section 9.2)

9.8 Municipal or private waste purification plants other than works being evaluated)

   9.8.1 Name of the plant

   9.8.2 Name of the owner

   9.8.3 Address, telephone, and fax no. and name of contact person

   9.8.4 Registration number of works (if applicable)

   9.8.5 Letters of acceptance of the waste by the owner of the works (attach a copy of the agreement for the delivery and acceptance of the waste)

   9.8.6 Purification plant compliance record

   9.8.7 Are there any quality acceptance limits in operation, e.g. Drainage by-laws
9.8.8 Are there any critical components in the raw waste (identify)

9.8.9 Effect of acceptance of the raw waste on the compliance record of the purification plant (Indicate on a plan-on a 1:50000-map)

Sewage treatment works

• municipal (local authority)

• other

• describe

Re-use

• agriculture/industrial/municipal/other

Land

• dams/ponds/evaporation

• irrigation only

• dams/ponds/irrigation

Stormwater drains

• name of nearest water course

Watercourse/river

• name

• name of greater catchment river

Estuary

• name of estuary Sea

• name of nearest town or beach

Disposal to solid waste disposal site
Part 10: Recommendations from other Interested Parties (To be submitted with the application)

10.1 Department of National Health

10.2 Department of Environmental Affairs

10.3 South African Bureau of Standards

10.4 Nature Conservation Bodies

10.5 Regional Government Institutions

10.6 Local Government Institutions

10.7 Department of Agriculture, Forestry and Fisheries

10.8 Department of Mineral Resources

10.9 Department of Energy

10.10 Other specialists

10.11 Non-governmental Organisations

10.12 Interested and Affected Parties

10.13 Public Participation

WATER TREATMENT PLANT (POTABLE USE)

Part 11

11.1 Summary of the scheme
11.1.1 Background

11.1.2 Design/scheme layout

11.1.3 Levels of service

11.2 Population projections for a period of 20 years

11.3 Water resource and water availability

11.4 Existing uses

11.5 Water Demand analysis

11.6 Type of reticulation

(Note – Numbering as published in original Gazette)

WASTE WATER TREATMENT WORKS AND WATER TREATMENT WORKS

Part 12: Conclusion

The conclusion should contain a concise request for the licence required and should include accurately completed licence application forms* obtainable from the Responsible authority.

*NOTE in order for the DWS to expedite the application in a shorter time as possible the correct information is essential.

Part 13: References and Supporting Documents

(References to back up the information supplied will be added as annexures under this section, e.g):

12.1 Geohydrological Report

12.2 Civil Design Report

2. AGRICULTURE TECHNICAL REPORT OR BUSINESS PLAN

1. Introduction
   1.1. Background
   1.2. Applicant details including ownership structure
   1.3. Project justification/industry overview and scope of the project
1.4. Specific project objectives
1.5. Summary of the project and authorisations required

2. The project area
   2.1. General
   2.2. Location and access
   2.3. Summary of the project
   2.4 Social arrangements
      2.4.1. Administration
      2.4.2. Settlement
      2.4.3. Beneficiaries and interested and affected parties
      2.4.4. Land ownership and properties on which water activities will be take place[sic]
      2.4.5. Socio-economics
   2.5. Physiognomy
      2.5.1. Climate
      2.5.2. Water resources and water availability
      2.5.3. Land and soils
      2.5.4. Existing infrastructure

3. Water and waste management framework
   3.1 Summary of all water uses and Annexure of forms
   3.2 Existing lawful water uses, generally authorized water uses, exemptions
   3.3 New water uses to be authorised

4. Agricultural development and production plan
   4.1. Current crop/animal management practices
   4.2. Proposed cropping/animal production
   4.3. System operations/herd management programme
   4.4. Production targets
   4.5. Crop/Animal water requirements estimates
   4.6. Marketing plan

5. Water resources development plan
   5.1. Water demand analysis
   5.2. Water abstraction
   5.3. Water supply plan to the production facilities
   5.4. Water balance

6. Technical design (Irrigation/drainage/animal facilities) plan
   6.1. Scheme layout/Animal handling facilities layout

7. Facility planning
7.1. Existing infrastructure
7.2. Infrastructure requirements
7.2. Roads, water, electricity and telecommunications

(Note – Numbering as published in original Gazette)

8. Financing plan
8.1. Capital cost estimates
8.2. Source of funds
8.3. Operational costs

APPENDICES AND SUPPORTING INFORMATION

Undertaking of water uses like taking of water from a water resource and storing water for agriculture is likely to trigger other water uses. The applicant must adhere to requirements for such activities and compile requisite technical reports like:

• Hydrology and Geohydrological report
• Wetland and watercourse impact studies - undertaking of taking and storing water uses is likely to trigger other water uses such as Section 21(c) and (i). This can be if the project entail activities listed below:
  • Civil designs for dams and pump stations
  • Watercourse crossings,

3. STREAM FLOW REDUCTION ACTIVITY REPORT

1. Background information

Profile of the applicant will be covered in the application forms (DW756/769 or DW758/771)

2. Existing lawful water uses and authorisations for the property
i. Pre 72 Authorizations
ii. Permit Number
iii. Licence Number

3. Location of the proposed activity and site description
i. Province, District and local Municipality, Tribal Authority or village
ii. Property (farm name, the number, portion and the full extent of property)
iii. Water Management Area and Quaternary Catchment
iv. GPS coordinates of the area applied for
v. Topographical Map.
vi. Current state of the proposed site (Grassland, Cultivated land (recently/currently cultivated and that cultivated more than 10 years ago), Jungle afforestation, Virgin land, Other formal forestry, other),

vii. Climate (Rainfall and Temperature)

viii. Watercourses affected by the activity such as wetlands, rivers and lakes, etc

ix. Soil Characteristics (depth and form)

x. Slope description

xi. Land preparation methods in relation to soil characteristics and slope gradient of the proposed area

xii. Accessibility of the site in terms of the road infrastructure

xiii. Proximity of proposed activity to other Land Users

xiv. Servitudes running through the property

4. Description of the activity

i. Purpose of the applied water use

ii. Target Market (description, location,)

iii. Area (ha) and Crop type (genus)

iv. Planting and harvesting plan

v. Start date and life span of the Activity

5. Marketing plan

i. Identified target market

ii. Off take agreement

iii. Marketing channels

6. Water use impacts and mitigations

• Watercourses (e.g. delineation, buffering, erosion/sedimentation, other)

• Watercourse crossings (e.g. proposed method of crossing, design, rehabilitation and maintenance)

• SFRA jungle (eradication, maintenance & control, other)

• Control of SFRA spread outside the demarcated area

• Impact on downstream users

• Other

i. Detailed Site Specific Management Plan

   • Watercourses

   • Watercourse crossings

   • SFRA jungle

   • Control of SFRA spread outside the demarcated area

   • Impact on downstream users

   • Other

7. Grower financing/Support plan
i. Start-up Capital, training/capacity building
ii. Proof of authorizations from DEA and DAFF
iii. SAHRA authorization
iv. Copy of Basic assessment or Environmental Impact Study
v. Proof of public participation process
vi. Contracts/Agreements on Beneficiation between the company and community,

Note: Undertaking of Section 21(d) is likely to trigger other water uses such as Section 21(c) and (i). This can be if the project entail activities listed below:

• Watercourse crossings,
• Planting within 1:100 year flood line of watercourses,
• Planting within the riparian zone and
• Planting within 32m from the edge of a watercourse
• Planting in a radius of 500m of a wetland.

The applicant will need to adhere to section 21 (c) and (i) requirements for the above activities.

4 INTEGRATED WATER AND WASTEWATER MANAGEMENT REPORT

1. Introduction
   1.1 Activity Background
   1.2 Regional setting and location of activity
   1.3 Property description
   1.4 Purpose of IWWMP

2. Conceptualisation of activity
   2.1 Description of activity
   2.2 Extent of activity
   2.3 Key activity related processes and products
   2.4 Activity life description
   2.5 Activity infrastructure description
   2.6 Key water uses and waste streams
   2.7 Organisational structure of activity
   2.8 Business and corporate policies

3. Regulatory water and waste management framework
   3.1 Summary of all water uses
   3.2 Existing lawful water uses
   3.3 Relevant exemptions
   3.4 Generally authorised water uses
   3.5 New water uses to be licenced
3.6 Waste management activity (NEMWA)
3.7 Waste related authorisations
3.8 Other authorisation (EIAs, EMPs, RODs, Regulations)

4. Present Environmental Situation
4.1 Climate
4.2 Regional Climate Rainfall
4.3 Evaporation
4.4 Surface Water
4.5 Water Management Area
4.6 Surface Water Hydrology
4.7 Surface Water Quality
4.8 Mean Annual Runoff (MAR)
4.9 Resources Class and River Health Receiving Water Quality Objectives and Reserve
4.10 Surface Water User Survey
4.11 Sensitive Areas Survey
4.12 Groundwater
4.13 Aquifer Characterisation
4.15 Hydro-census
4.16 Potential Pollution Source Identification
4.17 Groundwater Model
4.18 Socio-economic environment

(Note – Numbering as published in original Gazette)

5. Analysis and characterization of the water use activity
5.1 Site delineation for characterisation
5.2 Water and waste management
5.3 Process water
5.4 Stormwater
5.5 Groundwater
5.6 Waste
5.7 Operational Management
5.8 Organisational Structure
5.9 Resources and competence
5.10 Education and training
5.11 Internal and external communication
5.12 Awareness raising
5.13 Monitoring and control
5.14 Surface water monitoring
5.15 Groundwater monitoring
5.16 Bio monitoring
5.17 Waste monitoring
5.18 Risk assessment/Best Practice Assessment
5.19 Issues and responses from public consultation process
5.20 Matters requiring attention/problem statement
5.21 Assessment of level and confidence of information

6. **Water and Waste Management**
   6.1 Water and waste management philosophy (process water, stormwater, groundwater and waste)
   6.2 Strategies (process water, stormwater, groundwater and waste)
   6.3 Performance objectives/goals
   6.4 Measures to achieve and sustain performance objectives
   6.5 Option analyses and motivation for implementation of preferred options (optional)
   6.6 IWWMP action plan
   6.7 Control and monitoring
   6.8 Monitoring of change in baseline (environment) information (Surface water, groundwater and bio-monitoring)
   6.9 Audit and report on performance measures
   6.10 Audit and report on relevance of IWWMP action plan

7. **Conclusion**
   7.1 Regulatory status of activity
   7.2 Statement of water uses requiring authorisation, dispensing with licencing requirement and possible exemption from regulation

8. **References**

9. **Appendices: Specialist Studies**
   9.1 Geohydrology
   9.2 Civil design
   9.3 Wetland delineation report

5 **GEOHYDROLOGY REPORT**

1. **Introduction**

2. **Geographical setting**
   2.1 Topography and drainage
   2.2 Climate

3. **Scope of Work**

4. **Methodology**
   4.1 Desk study
4.2 Hydro-census
4.3 Geophysical survey and results
4.4 Drilling and siting of boreholes
4.5 Aquifer testing
4.6 Sampling and chemical analysis
4.7 Groundwater recharge calculations
4.8 Groundwater modelling
5.9 Groundwater availability assessment

(Note – Numbering as published in original Gazette)

5. Prevailing groundwater conditions
5.1 Geology
  5.1.1 Regional geology
  5.1.2 Local geology
5.2 Acid generation capacity
5.3 Hydrogeology
  5.3.1 Unsaturated zone
  5.3.2 Saturated zone
  5.3.3 Hydraulic conductivity
5.4 Groundwater levels
5.5 Groundwater potential contaminants
5.6 Groundwater quality

6. Aquifer Characterisation
6.1 Groundwater vulnerability
6.2 Aquifer classification
6.3 Aquifer protection classification

7. Groundwater Modelling
7.1 Software model choice
7.2 Model set-up and boundaries
7.3 Groundwater elevation and gradient
7.4 Geometric structure of the model
7.5 Groundwater sources and sinks
7.6 Conceptual model
7.7 Numerical model
7.8 Results of the model
  7.8.1 Pre-facility (Mining/Industry/Wastewater treatment plant, etc)
  7.8.2 During facility (mining/Industry/Wastewater treatment plant) operations
  7.8.3 Post-facility (mining/Industry/Wastewater treatment plant) operation

8. Geohydrological Impacts
8.1 Construction phase
  8.1.1 Impacts on Groundwater Quantity
  8.1.2 Impacts on Groundwater Quality
  8.1.3 Groundwater Management

8.2 Operational phase
  8.2.1 Impacts on Groundwater Quantity
  8.2.2 Impacts on Groundwater Quality
  8.2.3 Impacts on Surface Water
  8.2.4 Groundwater Management

8.3 Decommissioning phase

8.4 Post-mining phase
  8.4.1 Groundwater Quantity
  8.4.2 Groundwater Quality
  8.4.3 Cumulative Impacts
  8.4.4 Groundwater Management

9. Groundwater monitoring system
  9.1 Groundwater monitoring network
    9.1.1 Source, plume, impact and background monitoring
    9.1.2 System response monitoring network
    9.1.3 Monitoring frequency
  9.2 Monitoring parameters
  9.3 Monitoring boreholes

10. Groundwater Environmental Management Programme
  10.1 Current groundwater conditions
  10.2 Predicted impacts of facility (mining)
  10.3 Mitigation measures
    10.3.1 Lowering of groundwater levels during facility operation (Mining/Industry/Wastewater treatment plant, etc)
    10.3.2 Rise of groundwater levels post-facility operation (Mining/Industry/Wastewater treatment plant, etc)
    10.3.3 Spread of groundwater pollution post-facility operation (Mining/Industry/Wastewater treatment plant, etc)

11. Post Closure Management Plan
  11.1 Remediation of physical activity
  11.2 Remediation of storage facilities
  11.3 Remediation of environmental impacts
  11.4 Remediation of water resources impacts
  11.5 Backfilling of the pits.
12. Conclusion and Recommendations

6 WETLAND DELINEATION REPORT

1 Introduction
2 Terms of reference
3 Knowledge gaps
4 Study area
5 Expertise of the specialist
6 Aims and objectives
7 Methodology
   7.1 Wetland identification and mapping
   7.2 Wetland delineation
   7.3 Wetland functional assessment
   7.4 Determining the ecological integrity of the wetlands
   7.5 Determining the Present Ecological State of wetlands
   7.6 Determining the Ecological Importance and Sensitivity of wetlands
   7.7 Ecological classification and description

8 Results
   8.1 Wetland delineation
   8.2 Wetland unit identification
   8.3 Wetland unit setting
   8.4 Wetland soils
   8.5 Description of wetland type
   8.6 General functional description of wetland types
   8.7 Wetland ecological functional assessment
   8.8 The ecological health assessment of the opencast mining area
   8.9 The PES assessment of the remaining wetland areas
   8.10 The EIS assessment of the remaining wetland areas

9 Impact assessment discussions

10 Conclusions and recommendations

11 References

The reports listed below contain the standardised and accepted methods that must be used for determining the various aspects of assessments during the WUA process related to wetlands:

1) Wetland and riparian habitat delineation document (DWS report on DWS website);
2) Wetland Buffer Guideline (SANBI WRC project and Report, on DWS website)
3) Wetland Offset (WRC report TT660/16; on DWS website)
4) High Risk Wetland Atlas (WRC Report TT659/16, on DWS website)
5) Wetland Rehabilitation in mining landscapes (WRC Report TT658/16, on DWS website)
6) Risk Assessment Protocol and associated Matrix (DWS document on DWS Website)

Permission to Occupy (PTO), Title Deed, Lease Agreement, Community Resolution

A description of the location of the activity, including

(aa) the 21 digit Surveyor General code of each cadastral land parcel,
(bb) where available, the physical address or farm name,
(cc) the coordinates of the boundary of the property or properties,

When providing coordinates, such coordinates must be provided in degrees, minutes and seconds using the Hartebeesthoek 94 WGS84 coordinate system.

a plan which locates the proposed activity or activities applied for at an appropriate scale, or if it is –

(aa) a linear activity, a description and coordinates of the corridor in which the proposed activity or activities is proposed; or
(bb) on land where the property has not been defined, the coordinates of the area within which the activity is proposed.

Where applicable, proof of acceptance of an application for any right or permit in terms of the Mineral and Petroleum Resources Development Act, 2002 or environmental authorisation as per regulation 7 must be provided.

SECURITY AND GUARANTEE

DEED OF SURETYSHIP (to be completed prior to award of licence)

WHEREAS: the responsible authority awarded a licence to ........................................... (hereinafter called "the Licencee") dated ........../........./........ for the authorisation of water use activities in the licence, and it is provided by such licence that the Licencee shall provide the responsible authority with security by way of suretyship for the due and faithful fulfilment of such conditions of the Licencee;

AND WHEREAS ............................................................................................................................
Has/have at the request of the Licencee, agreed to give such security;

NOW THEREFORE WE,

...................................................................................................................................................
do hereby guarantee and bind ourselves jointly and severally as Sureties and Co-principal Debtors to the responsible authority under renunciation of the benefits of division and excursion for the due and faithful performance by the Licencee of all the terms and conditions of the said Licence, subject to the following conditions:

1. The responsible authority shall, without reference and/or notice to us, have complete liberty of action to act in any manner authorised and/or contemplated by the terms of the said Licence, and/or to agree to any modifications, variations, alterations, directions or extensions of the conditions under said Licence, and at that its rights under this guarantee shall in no way be prejudiced nor our liability hereunder be affected by reason of any steps which the responsible authority may take under such Licence, or of any modification, variation, alteration of the conditions which the responsible authority may make, give, concede or agree to under said Licence.

2. The responsible authority shall, at any time during the subsistence of this licence and within five years after the licence has expired, be entitled, without reference to us, to release any securities held by it, and to give time to or compound or make any arrangement with the Licensee, if any licence condition or provision of the Act is being violated.

3. This guarantee shall remain in full force and effect until the issue of the Certificate of Rehabilitation in terms of the Licence, unless we are advised in writing by the responsible authority before the issue of the said Certificate of his intention to institute claims, and the particulars thereof, in which event the guarantee shall remain in full force and effect until all such claims have been paid or liquidated.

4. Our total liability hereunder shall not exceed the sum of ...........................................................
   ... (R ......................................)
5. The licensee hereby attaches a letter of credit from the bank, a surety or a bank guarantee, a bond, or an insurance policy [*delete whichever is not applicable], in favour of the responsible authority.

6. We hereby choose *domicilium citandi et executandi* for all purpose arising hereof at .........................................
