Dear Applicant,

REQUIREMENT FOR ADDITIONAL INFORMATION WITH REGARDS TO THE POSTPONEMENT APPLICATION FOR COMPLIANCE WITH THE 2015 MINIMUM EMISSION STANDARDS FOR THE CAMDEN POWER STATION

This letter serves to inform you that after a preliminary review of your postponement application, the following was observed:

- Current stack emission limits are not supplied;
- There is no compliance plan into the future;
- Ambient air quality monitoring graphs are not presented in time series plots to clearly indicate the trend in air quality as well as exceedances;
- The frequency plots do not accurately represent monitoring data, therefore, data gaps, trends or time evolution of pollutants cannot be observed; and
- There is limited data supplied to undertake the PM_{2.5} health and environment impact;

In order to continue to consider your application and to make an informed decision, you are required to provide information that addresses the issues raised herein. Please note that your application will be placed on hold until such time the information has been supplied.

Yours Sincerely,

DR. Thulie Mdluli
NATIONAL AIR QUALITY OFFICER (NAQO)
