Dear Applicant,

REQUIREMENT FOR ADDITIONAL INFORMATION WITH REGARD TO THE POSTPONEMENT APPLICATION FOR COMPLIANCE WITH THE 2015 MINIMUM EMISSION STANDARDS FOR DUVHA POWER STATION

This letter serves to inform you that after a preliminary review of your postponement application, the following was observed:

- Ambient air quality monitoring graphs are not presented in time series plots to clearly indicate the trend in air quality as well as exceedances;
- There is no modelled data with isopleths to indicate the positions of residential areas;
- There is no indication of assessments of emissions' impact to human health and the environment given; and
- Assessment for environmental impact was only conducted for FGD and not for the impact of the facility of the receiving environment as required by legislation.

In order to continue to consider your application and to make an informed decision, you are required to provide information that addresses the issues herein. Please note that your application will be placed on hold until such time the information is made available.

Yours Sincerely,

Dr. Thuli N. Mdluli
NATIONAL AIR QUALITY OFFICER (NAQO)
