Dear Mr. Mahlangu

EMISSIONS MONITORING SYSTEM AVAILABILITY

Hendrina Power Station is operating under Atmospheric Emission License number: 17/4/AEL/MP312/11/16. According to section 7.2 of the emission license, the station is required to report on its emission performance and air quality related operations on a regular basis.

Partial unavailability of data for SO₂, NO_x data was experienced on the South Stack from mid June 2016. The challenge is currently being addressed and we anticipate that it will be finalised within the month of July 2016.

The overall trends show that the station has been within limits prior to data unavailability of the mentioned parameters.

As per the reporting requirements of section 15 b) of the Minimum Emission Standards, table 1 below lists the availability of the continuous emissions monitoring system for the 2015/2016 financial year.

Table 1. Monitor availability for 2015/2016 financial year:

	North Stack	South Stack
PM	100 %	100 %
SO ₂	78.1 %	84.4 %
NO _x	78.1 %	84.4 %

Eskom would appreciate your consideration of the above. Please do not hesitate to contact the station should you need further clarity.

Your understanding in this regard is highly appreciated.

Yours sincerely

N. Mkhize
POWER STATION MANAGER
